Aspiring Full-Stack MERN Developer targeting opportunities to apply hands-on project experience in building scalable, responsive, and API-driven web applications. Skilled in React.js, Node.js, Express.js, and MongoDB with exposure to authentication systems, RESTful APIs, and deployment practices. Eager to explore Agentic AI roles and contribute to development teams while continuously enhancing technical and problem-solving skills in a growth-oriented environment.

Core Competencies

MERN Stack Development

Full Stack Web Application Development

React.js Frontend Development

Node.js Backend Development

RESTful API Development & Integration

MongoDB Database Management

JWT Authentication Implementation

Role-Based Access Control Systems

Responsive Web Application Design

CI/CD Pipeline Deployment

Skill Set

Technical Knowledge: HTML5, JavaScript, CSS3, Kali Linux (Basics), AWS

Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS

Database: MongoDB

Tools: Git, GitHub, Postman, Vercel, Netlify, CI/CD Pipelines, AI, DevOps, Render

Soft Skills: Time Management, Problem Solving, Analytical Thinking, Priority Management, Stake holder management

Certifications

- ICL Service Solutions – Cybersecurity Trainee
- Error Makes Clever – Full Stack Web Development (MERN)

Education

- MBA** | 2019–2021
SASTRA Deemed to be University

Profile Summary

- Associate-level Full-Stack MERN Developer with strong practical experience in building and deploying web applications using React.js, Node.js, Express.js, and MongoDB through self-driven and academic projects.
- Demonstrated capability in implementing secure and functional backend systems including RESTful APIs, JWT-based authentication, Role-Based Access Control (RBAC), and database-driven application workflows.
- Experienced in delivering complete project lifecycles including responsive UI development, API integration, version control using Git/GitHub, and deployment using Vercel and Netlify with exposure to CI/CD practices.

Internship

ICL Service Solutions, Chennai | Penetration Tester | Jun’25 – Aug’25

Projects

LexiBreak (Quiz Application) | React.js, JavaScript, Tailwind CSS, React Router, REST API, Vercel | Feb’26 – Mar’26

Live Demo: <https://lexi-break-quiz-react.vercel.app/>

- Developed a responsive quiz application using **React.js**, implementing reusable components and **React Hooks (useState, useEffect)** for quiz flow, scoring, state management, and dynamic UI rendering.
- Implemented **client-side routing with React Router** and conditional rendering to manage navigation across multiple quiz levels, question states, and results.
- Integrated external **REST APIs** using asynchronous JavaScript for dynamic question fetching and deployed the application on **Vercel** using a Git-based deployment workflow.

Brew Invoice | React.js, Node.js, Express.js, MongoDB, JWT, API, Vercel | Aug’26-Sep’26

Live Demo: <https://brewbill-frontend.vercel.app/>

- Developed a full-stack invoice management application using **React.js, Node.js, Express.js, and MongoDB**, enabling users to manage clients and generate professional invoices.
- Implemented **JWT-based authentication and protected REST APIs**, with user-scoped access to clients and invoices and secure backend authorization.
- Designed RESTful backend services for **client and invoice CRUD operations**, including invoice item management, subtotal, tax, discount, total calculations, and invoice status tracking.

Brew Desk (CRM Application) React.js, Node.js, Express.js, MongoDB, JWT, Render, Vercel | September 2026

Live Demo: <https://brewdesk-frontend.vercel.app/>

- Developed a full-stack **CRM application** using React.js, Node.js, Express.js, and MongoDB to manage client records through a responsive and structured interface.
- Architected and integrated scalable **RESTful APIs** using Node.js and Express.js to enable efficient CRUD operations between frontend & backend services, ensuring smooth application data flow.
- Implemented a complete frontend-to-backend data flow using **React.js, REST APIs, and asynchronous API handling**, with form validation, loading states, and error handling for reliable user interactions.
